Power Factors

June 12, 2023

Dear Hiring Manager,

As a passionate Data Scientist with 5 years of multi-disciplinary experience, I'm thrilled to apply for the Data Scientist, Solar position at Power Factors. My expertise in developing innovative machine learning solutions, leading data-driven projects, and serving as a technical resource aligns perfectly with your requirements.

As a trained climate scientist, I am passionate about combining my knowledge and data science practice to contribute to the fight of climate crisis. I have always been driven by the potential of renewable energy and the application of data science in maximizing its utility. I am particularly drawn to Power Factors' dedication to fighting climate change with code, and the opportunity to contribute to a future fueled by renewable energy excites me. The intricacies of handling renewable energy data, formulating data science tools, and managing data-centered projects pose challenges that I am ready and equipped to face.

Moreover, I'm excited about the chance to work with a diverse team of renewable industry experts. My proven track record of building strong collaborations in cross-functional teams will enable me to seamlessly integrate into your existing team and deliver valuable insights right from the start.

I am thrilled at the prospect of bringing my technical skills and enthusiasm for renewable energy to Power Factors and look forward to discussing how I can contribute to your team.

Thank you for considering my application.

Sincerely

Yu Cheng
